

Report, Respond, Resolve, Rapidly

The first all-in-one mass communication, emergency management, and incident resolution system.

Report an Emergency

Punch Alert's mobile app turns any iOS or Android device into a mobile, smart panic button. Students, faculty, or administration can push a button on their phone to report emergencies, violence, or other incidents, immediately alerting the right responders. Educational institutions can use Punch Alert to improve the college experience by allowing anyone on campus to submit tips or report emergencies. *See Something, Share Something™*

Collect & Share Information

Any user can submit information to emergency responders in real time within the app in different formats – text notes, images, video and audio recordings. Emergency responders can send warnings or announcements to all staff and students as mass notifications. The app includes an open communication forum that can be used by staff and emergency responders to communicate and coordinate efforts during an emergency. Information and warnings can be submitted to specific groups of users, including campus security, faculty and students.

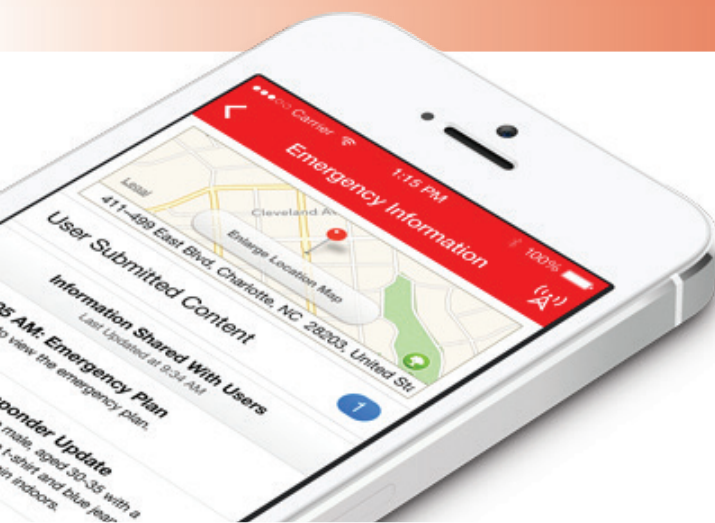

Management & Resolution

Instantly after an emergency is reported, responders receive an email, text message, push notifications and automated phone call with the name and location of the person who reported the emergency. Responders can screen emergencies as they come in, release them to specific users, distribute emergency plans, share content and updates, as well as resolve the emergency – all from their mobile device.

Accurate Location Tracking During Emergencies

All educational institutions using Punch Alert are geofenced to ensure that only those on-site are tracked in an emergency. Punch leverages GPS, Cell and WiFi to triangulate location within the geofence of the facility. Punch also offers iBeacons which allow you to accurately determine the specific indoor location, down to the exact room, of users during an emergency.

Connect your Campus

A learning environment should always feel safe and connected. With Punch Alert, all staff, faculty, students, and visitors can be engaged in a collaborative and fun approach to campus safety. Anyone can post tips, report emergencies, and receive announcements from the comfort of their smart-phone.

- Collect information from multiple sources at once to better understand situations
- Disseminate alerts and instructions to everyone or specific groups of people.
- Locate staff and students in an emergency, even indoors.
- Monitor a customizable dashboard for all tips, emergencies, and announcements.

Inform Key Personnel in Real-time

As incidents occur, it becomes critically important to notify the right people in the organization to get ahead of any potential fallout. Punch Alert allows you to automatically notify the right people or departments (Campus Security, Public Relations, & Faculty and Students, etc) upon categorization and release of an incident or emergency.

Improve the College Experience

Never has it been more important for educational institutions and campuses to ensure the highest quality of experience for their students and visitors. With Punch Alert, schools, colleges and other facilities can offer students free access to their network of safety. Visitors can easily participate as well by downloading the app and joining the schools' public network. That's it! Users are connected with public announcements and the ability to post tips or report emergencies. Connect to your community and *See Something, Share Something™*.

- Truly Portable Panic Button
- Beacons Enable Exact Location Awareness
- Prevent Violence
